

AI Event Coordinator: Event Blueprint

Generated by Intelligent System for Automated Planning

Venue Recommendations

As a Venue Expert, I understand the challenge of balancing a College Festival's aspirations for a "modern, tech-focused" event with a tight budget of 50,000 INR for 500 attendees, especially when including catering. At 100 INR per person (venue + catering), the budget is extremely constrained, necessitating creative solutions and prioritizing cost-effectiveness. The "modern" and "tech-focused" aspects will primarily come from the inherent facilities where available or through strategic, minimal external rentals. Catering will likely be limited to basic refreshments or a very simple meal.

Here are 3 realistic venue types or specific examples suitable for your requirements in Hyderabad:

1. ****On-Campus Facilities of a College/University (e.g., JNTU Hyderabad Auditorium/Grounds, OU Campus)****

- * ****Suitability:**** This is by far the most budget-friendly and realistic option for a college festival. Using facilities from the host college or a neighboring institution often comes with heavily subsidized rates or even free usage, especially for student events. They are well-equipped to handle large groups.

- * ****Modern/Tech Aspect:**** Many established and newer universities in Hyderabad boast modern auditoriums and multi-purpose halls. While perhaps not cutting-edge, their infrastructure is generally robust. Campus-wide Wi-Fi is standard.

- * ****Catering:**** Leveraging the college's existing canteen or mess facilities can provide extremely cost-effective and basic catering for 500 attendees, making the budget feasible.

- * ****Key Facilities:****

- * ****Auditorium:**** Built-in PA (Public Address) system, microphones, large projection screens and projectors, stage, and fixed seating for hundreds.

- * ****Open Grounds/Sports Fields:**** Ample space for erecting temporary stalls, outdoor activities, or a main stage (may require external rental for advanced staging).

- * ****Wi-Fi:**** High-speed campus internet access.

- * ****Power Outlets:**** Available for various activities and AV equipment.

- * ****Catering:**** Access to college canteens/mess for simple meals or refreshments.

2. ****GHMC-run Community Halls or Public Function Halls in Suburbs (e.g., larger community halls in**

Gachibowli, Kondapur, or Uppal)**

- * **Suitability:** These halls are generally more affordable than private venues and designed to accommodate large gatherings. Finding one that's recently renovated could meet the "modern" aesthetic to some extent.

- * **Modern/Tech Aspect:** Tech capabilities are often basic. A simple PA system and perhaps a projector might be included. For "tech-focused," you might need to allocate a small portion of the budget for external rental of additional AV equipment (e.g., better speakers, brighter projector).

- * **Catering:** These venues typically allow external caterers, which offers flexibility in sourcing the most budget-friendly catering options for basic snacks or a simple buffet.

- * **Key Facilities:**

- * **Main Hall:** Large open space for flexible seating arrangements, a makeshift stage, and activity zones.

- * **Basic Audio System:** Standard PA system with microphones.

- * **Projector/Screen:** Often available, but quality can vary.

- * **Power Outlets:** Sufficient for basic event lighting and equipment.

- * **Catering Area:** Dedicated space for food preparation and serving, making external catering logistics easier.

3. **Event Spaces within Startup Incubators or Large Co-working Campuses** (e.g., specific event zones at T-Hub, or large common areas in select WeWork-like spaces if negotiated for off-peak times)

- * **Suitability:** This option inherently aligns with "modern" and "tech-focused," boasting contemporary design and advanced infrastructure. However, the budget is an *extreme challenge* here and would require *significant negotiation*, off-peak timing (e.g., a Sunday evening), or partial sponsorship for a college event.

- * **Modern/Tech Aspect:** These spaces are built for innovation, featuring excellent high-speed internet, state-of-the-art display technologies, and professional sound systems.

- * **Catering:** Many have in-house cafes or tie-ups that can provide basic, modern catering (e.g., coffee, tea, pastries, simple wraps). Again, budget negotiation for very basic options is crucial.

- * **Key Facilities:**

- * **High-End A/V:** Advanced projectors, large LED screens, professional sound systems, wireless microphones, and video conferencing capabilities.

- * **High-Speed Wi-Fi:** Robust and reliable internet infrastructure.

- * **Modern Seating & Furniture:** Flexible layouts and contemporary design.

- * **Breakout Zones:** Smaller meeting rooms or open areas for different festival activities or workshops.

- * **Catering:** Access to in-house cafeterias or ability to arrange simple, light refreshments tailored to a modern, tech-focused event.

Event Agenda

Here's a detailed, chronological agenda for your Modern, Tech-Focused College Festival in Hyderabad, designed for 500 attendees, incorporating catering, and structured as requested.

The Tech Spark Festival: Igniting Innovation in Hyderabad

- **Date:** [Insert Date]
- **Venue:** [Insert Venue Name - e.g., University Convention Center, HICC]
- **Attendees:** 500 College Students
- **Theme:** Bridging Ideas with Innovation: Exploring Future Tech & Career Pathways

Festival Agenda: A Day of Innovation & Connection

08:30 AM - 09:30 AM: Registration & Welcome Breakfast

- Activity:** Smooth digital check-in using QR codes via the festival's dedicated mobile app. Attendees receive a welcome kit including an RFID-enabled badge, agenda, and exclusive swag.
- Catering:** Light breakfast buffet featuring local favorites and continental options (Idli, Dosa, Poha, pastries, fruit, coffee, tea, juices).
- Atmosphere:** Upbeat background music, digital screens displaying event schedule, sponsor logos, and live social media feed (#TechSparkHYD). Networking opportunity with fellow attendees and early bird speakers.
- Location:** Main Entrance Foyer & Designated Breakfast Zone.

09:30 AM - 10:30 AM: Grand Keynote Address: "Hyderabad's Tech Horizon & Your Role in It"

- Speaker:** A prominent tech leader, startup founder, or AI/Web3 visionary from Hyderabad's bustling tech ecosystem.
- Content:** An inspiring talk on emerging technologies, global tech trends, innovation in India, and how college students can prepare for future tech careers. Focus on AI, Blockchain, Cybersecurity, and Data Science.
- Format:** Dynamic presentation with interactive elements (live polling via app, Q&A session).
- Location:** Main Auditorium/Hall.

10:30 AM - 10:45 AM: Networking & Coffee Break

- * **Activity:** A brief interlude for attendees to grab a quick coffee/tea, stretch, and engage in informal networking. Opportunity to visit partner booths or pre-register for workshops if needed.
- * **Catering:** Coffee, tea, and light refreshments.
- * **Location:** Foyer & Partner Showcase Area.

10:45 AM - 12:15 PM: Practical Workshop Session 1 (Parallel Tracks)

- * **Activity:** Attendees choose one of five concurrent, hands-on workshops. These sessions are designed to be interactive and skill-building.
- * **Tracks (Attendees pre-registered via app):**
 - * **Track A: AI & Machine Learning:** "Building Your First ML Model with Python & TensorFlow" (Requires basic Python knowledge).
 - * **Track B: Web3 & Blockchain:** "Demystifying NFTs & Smart Contracts: An Intro to Solidity" (Conceptual + practical demo).
 - * **Track C: Cybersecurity Essentials:** "Ethical Hacking 101: Understanding Vulnerabilities & Protections" (Interactive simulation).
 - * **Track D: UI/UX Design Sprint:** "Designing Intuitive Experiences: Figma for Rapid Prototyping" (Bring your laptop with Figma installed).
 - * **Track E: IoT & Smart Devices:** "Introduction to Arduino: Prototyping Your First Smart Gadget" (Hardware kits provided).
- * **Location:** Dedicated Breakout Rooms/Labs (5 rooms).

12:15 PM - 01:45 PM: Lunch & Tech Networking Fair

- * **Catering:** A diverse and generous buffet lunch featuring a mix of Hyderabad specialties and multi-cuisine options (Biryani, curries, live pasta counter, salads, desserts). Vegetarian and non-vegetarian options clearly marked.
- * **Activity:** Dedicated networking zones to facilitate connections. A "Tech Fair" with booths from local startups, tech companies showcasing career opportunities, and university research labs.
- * **Atmosphere:** Lively, with designated quiet areas for focused conversations.
- * **Location:** Grand Ballroom/Cafeteria & Exhibition Hall.

01:45 PM - 03:15 PM: Practical Workshop Session 2 (Parallel Tracks)

- * **Activity:** Another opportunity for attendees to dive deep into a different tech area, building on skills or exploring a new domain.
- * **Tracks (Attendees pre-registered via app):**
 - * **Track A: Data Science & Analytics:** "Visualizing Data for Impact: Hands-on with Power BI/Tableau" (Bring your laptop).
 - * **Track B: Cloud Computing:** "AWS/Azure Fundamentals: Deploying Your First Web App in the Cloud" (Requires basic understanding of web apps).

- * **Track C: Mobile App Development:** "React Native Basics: Building a Cross-Platform Mobile App" (Bring your laptop).

- * **Track D: Gaming & VR/AR:** "Introduction to Unity Engine: Creating Simple 3D Environments" (Software pre-installed on lab computers or bring high-spec laptop).

- * **Track E: Robotics & Automation:** "ROS (Robot Operating System) Explained: Programming a Virtual Robot" (Software pre-installed on lab computers).

- * **Location:** Dedicated Breakout Rooms/Labs (5 rooms).

03:15 PM - 03:30 PM: Refreshment Break

- * **Catering:** Coffee, tea, and a selection of light snacks (cookies, fruit chaat).

- * **Activity:** Quick break to re-energize before the final main session.

- * **Location:** Foyer.

03:30 PM - 04:30 PM: Future Tech Showcase & Interactive Zone / Expert Panel Discussion

- * **Option 1 (Showcase):** "Innovation Hub & Startup Pitch Pad"

- * Local startups and student innovators present their projects/products in a dynamic showcase format. Attendees can interact directly with the creators, try out demos, and witness rapid-fire student startup pitches.

- * **Activity:** Live demonstrations, Q&A with innovators, and voting for "Audience Favorite Tech Spark."

- * **Option 2 (Panel Discussion):** "Navigating the Future: Careers in Emerging Technologies"

- * A moderated panel discussion featuring industry experts, HR leaders from tech companies, and successful young entrepreneurs.

- * **Content:** Discussion on essential skills for the future, interview tips, remote work trends, and personalized career advice. Live Q&A via the festival app.

- * **(For this agenda, let's go with the Interactive Zone/Showcase for more hands-on engagement after workshops)***

- * **Location:** Main Auditorium/Hall & adjacent open space.

04:30 PM - 04:45 PM: Transition to Main Stage

- * **Activity:** Attendees move back to the main auditorium for the closing ceremony. Upbeat music and visual prompts guide the transition.

04:45 PM - 05:30 PM: Closing Ceremony & Valedictory Session

- * **Activity:**

- * **Recap & Highlights:** A short video montage of the day's best moments.

- * **Key Takeaways:** Brief summary of the insights gained from workshops and sessions.

- * **Awards & Recognition:** Acknowledge workshop facilitators, volunteers, and announce the "Audience Favorite Tech Spark" from the showcase.

- * **Vote of Thanks:** Appreciation to all speakers, sponsors, partners, and especially the attendees for

making the festival a success.

- * **Future Outlook:** Encouragement to stay connected, continue learning, and hints at future events.
- * **Energetic Send-off:** Lively music and a final message of inspiration.
- * **Location:** Main Auditorium/Hall.

Post-Event: Digital feedback forms circulated via the festival app, and access to recorded keynote/panel sessions made available to attendees. Social media channels continue to share highlights and encourage interaction.

Logistics and Resources

As the Logistics & Procurement Manager for our College Festival in Hyderabad, with a budget of \$50,000 for 500 attendees, my strategy will focus on maximizing impact and functionality while maintaining a "moderate" budget context. We'll prioritize essential services, leverage local vendors, and utilize student volunteers efficiently.

Here's my resource suggestion breakdown:

I. Audio/Visual (A/V) Equipment

The A/V setup needs to support a main stage (for performances, speeches, DJ sets) and potentially a couple of smaller zones for workshops or chill-out areas.

1. Main Stage (Primary Focus - High Impact):

- * **PA System (Sound Reinforcement):**
 - * **Speakers:** 4x high-quality Line Array Speakers (2 per side) + 2x Subwoofers for robust sound coverage across the main performance area.
 - * **Monitors:** 4x Stage Monitors for performers.
 - * **Mixer:** 1x Digital Mixer (e.g., Behringer X32 or similar) for flexibility, multiple channels, and easy sound engineering.
 - * **Microphones:**
 - * 4x Wireless Handheld Microphones (for hosts, Q&A, guest speakers).
 - * 4x Wired Handheld Microphones (for backup, specific performances).
 - * 2x Lapel/Headset Microphones (for anchors/presenters requiring hands-free movement).

- * 1x DJ Mixer & 2x DJ Decks (if a DJ is performing).
- * **Processing:** Necessary equalizers, compressors, gates (often built into digital mixers).
- * **Cabling:** All necessary XLR, power, and signal cables.
- * **Visuals:**
 - * **LED Wall:** 1x large LED Wall (e.g., 10ft x 15ft or 12ft x 20ft) at the back of the stage. This provides excellent visibility in various lighting conditions (even daylight) and creates a strong visual impact for presentations, live camera feeds, sponsor logos, and dynamic backgrounds.
 - * **Projector (Backup/Secondary):** 1x High-Lumen Projector (e.g., 5000-7000 ANSI lumens) with a large Fast-Fold Screen (8ft x 12ft) for a secondary zone or as a backup visual for the main stage.
 - * **Laptops:** 2x High-Spec Laptops (for content playback, presentations, and live mixing).
- * **Lighting:**
 - * **Stage Wash:** 6-8x LED PAR Cans for general stage illumination.
 - * **Moving Heads:** 4-6x Moving Head Lights (Beam/Spot) for dynamic effects during performances.
 - * **Strobe/Blinder:** 2x Strobe Lights for special effects.
 - * **Hazer/Fog Machine:** 1x Hazer (more subtle than a fog machine, enhances light beams).
 - * **Lighting Console:** 1x DMX Controller for light programming.
- * **Power Distribution:**
 - * **Generators:** 1x Main Generator (e.g., 63 kVA) + 1x Backup Generator (e.g., 30 kVA). Reliable power is paramount.
 - * **Distribution Boards:** All necessary power distribution boards and heavy-duty cabling.

2. **Smaller Zones (e.g., Workshop Area / Chill-out Zone):**

- * **Sound:** 2x Powered Speakers (e.g., 12-inch) with 2x Wired Microphones and a small 8-channel mixer.
- * **Visuals:** 1x Standard Projector (e.g., 3000-4000 ANSI lumens) with a Tripod Screen (6ft x 8ft).

3. **Overall A/V Budget Context:** We'll seek packages from reputable A/V rental companies in Hyderabad. Prioritizing the LED wall for the main stage offers the best visual return on investment, reducing the need for elaborate set designs. The lighting will be functional and impactful, not overly complex.

II. Seating Style

Given a college festival, we need a mix of dynamic standing areas, comfortable resting spots, and functional seating for specific activities.

1. **Main Stage Performance Area:**

- * **Standing Space (Primary):** The majority of the area in front of the stage will be open for standing, dancing, and mingling ? typical for a festival vibe.

- * **Theater Style (Rear/Sides):** For those who prefer to sit and watch, we'll arrange approximately **150-200** simple, stackable plastic chairs in rows behind the main standing area or to the sides. This provides comfort without impeding the energetic crowd upfront.

- * **VIP/Judge Seating:** A small section (20-30 chairs) near the stage, perhaps slightly more comfortable chairs, for faculty, judges, or special guests.

2. **Workshop/Interactive Zones (1-2 Zones):**

- * **Classroom Style:** For workshops requiring note-taking, drawing, or focused group activities, we will set up **50-70** individual chairs with writing tablets (or small desks with chairs). This allows for focused interaction. Configuration can be flexible (U-shape, clusters, or traditional rows).

3. **Food Court / Chill-Out Zones (2-3 Zones):**

- * **Round Table & Chairs:** Approximately **15-20** round tables (4-6 seater) with a total of **80-100** chairs. These are excellent for group dining, socializing, and resting.

- * **Lounge Seating:** For a more relaxed vibe, **20-30** bean bags, low benches, or simple pallet seating with cushions. These are cost-effective and popular with students.

4. **General Seating/Resting:**

- * **Scattered Benches:** A few sturdy, temporary benches placed strategically around the festival grounds for quick rests.

5. **Registration/Information Desks:**

- * **Chairs:** 4-6 office chairs for staff members.

6. **Overall Seating Budget Context:** We'll primarily rent sturdy, cost-effective plastic chairs for the majority of needs. The focus is on functionality and providing options, not luxury. We'll limit the number of more expensive classroom-style setups to specific zones.

III. Staffing Needs

Efficient staffing is crucial for safety, smooth operations, and a positive attendee experience. We will heavily leverage student volunteers for non-specialized roles.

1. **Core Event Management Team (Already in place, but roles expanded):**

- * **Event Coordinator:** 1 (Overall lead)
 - * **Logistics & Procurement Lead:** 1 (Me, overseeing all vendors, equipment, setup)
 - * **Marketing & Communications Lead:** 1 (Promotions, social media, signage)
 - * **Volunteer Coordinator:** 1 (Manages all student volunteers)
2. **Registration & Information Desk (Leverage Volunteers):**
- * **Registration Desk Staff:** 6-8 Student Volunteers (in shifts, e.g., 3-4 per shift) for check-in, wristband distribution, and basic queries.
 - * **Information Booth Staff:** 2-3 Student Volunteers for advanced queries, lost & found, and directional assistance.
 - * **Supervisor:** 1 Experienced Volunteer or Core Team Member overseeing both.
3. **Technical Support (Professional & Volunteer):**
- * **A/V Technicians:** 3-4 Professionals (contracted from A/V vendor) ? 2 for Main Stage (Sound Engineer, Lighting Engineer/LED operator), 1-2 for roving support/secondary zones.
 - * **Power Management:** 1-2 Electricians (contracted, especially for generator management and safety checks).
 - * **Tech Support Volunteers:** 2-3 Student Volunteers to assist A/V techs, manage laptops, and run errands.
4. **Stage Management & Production (Volunteer & Core Team):**
- * **Stage Manager:** 1 Core Team Member or highly experienced volunteer (directs performances, ensures schedule adherence).
 - * **Backstage Crew:** 4-6 Student Volunteers for artist liaison, props management, and general stage assistance.
5. **Security & Safety (Professional & Volunteer):**
- * **Professional Security Guards:** 8-10 Contracted Guards (for entry points, crowd control, backstage security, and cash handling if applicable). Essential for a 500-person event.
 - * **Student Marshals/Bouncers:** 10-15 Student Volunteers (briefed on crowd management, emergency procedures, and assisting professional security).
 - * **First Aid/Medical Team:** 2 Certified Paramedics/Nurses with a basic first-aid station (contracted or from college medical staff). Non-negotiable for attendee safety.
6. **Operations & Venue Management (Heavy Volunteer Focus):**
- * **Setup/Teardown Crew:** 10-15 Student Volunteers (for general setup, furniture placement, banner hanging, and post-event cleanup).
 - * **Waste Management Crew:** 4-6 Student Volunteers (regularly emptying bins, keeping areas tidy,

coordinating with cleaning staff).

- * **Runners/General Support:** 5-7 Student Volunteers (flexible roles, assisting wherever needed).

7. **Overall Staffing Budget Context:** We will minimize paid staff to critical roles (A/V operations, professional security, medical personnel) where expertise and liability are key. Student volunteers will be the backbone, motivated by experience, festival access, and appreciation (e.g., certificates, food, t-shirts). This significantly reduces personnel costs.

Summary of Moderate Budget Approach:

- * **A/V:** Invest in a strong LED wall for high impact; otherwise, go for functional and reliable equipment over premium brands. Leverage A/V rental packages.
- * **Seating:** Prioritize versatile, cost-effective stackable chairs. Limit specialized seating to specific functional zones. Maximize open standing areas.
- * **Staffing:** Crucially, build a robust volunteer program. Only hire professionals for roles requiring specific certification, high technical expertise, or significant liability (A/V operators, security, medical).

By adhering to this plan, we can deliver a dynamic, engaging, and safe college festival for 500 people within our \$50,000 budget in Hyderabad.

Actionable Checklist

As your Event Project Coordinator, here is a comprehensive, tech-focused preparation checklist for your College Festival in Hyderabad, designed for 500 attendees, incorporating modern elements and catering.

College Festival Preparation Checklist: Hyderabad 2024 (500 Attendees)

Festival Theme: Modern Tech Showcase & Cultural Fusion

Goal: Deliver an engaging, seamless, and memorable experience for college students, emphasizing technology, innovation, and vibrant culture.

Phase 1: Pre-Event Planning & Procurement

A. Strategic Planning & Core Team

- * ☐ Define Festival Vision, Goals, and KPIs (Key Performance Indicators)
- * ☐ Establish Core Organizing Committee & Allocate Roles (e.g., Logistics, Tech, Marketing, Finance, Content, Catering)
- * ☐ Develop Detailed Event Schedule & Milestones
- * ☐ Create Comprehensive Budget (Income & Expenditure)
- * ☐ Set up Project Management Tool (e.g., Asana, Trello) for task tracking

B. Venue Selection & Logistics (Hyderabad Specific)

- * ☐ Research potential venues in Hyderabad suitable for 500 people with good connectivity & modern amenities (e.g., college grounds, convention centers, large banquet halls with outdoor space)
- * ☐ Conduct Site Visits to shortlisted venues (check power infrastructure, internet availability, security, restrooms, parking, rain contingency options)
- * ☐ Obtain Venue Availability & Quotes
- * ☐ Negotiate & Sign Venue Contract
- * ☐ Secure all necessary permits and licenses from Hyderabad authorities (Police, Fire Department, GHMC, Entertainment Tax if applicable)
- * ☐ Develop Site Map & Floor Plan (including stage, tech zones, catering, registration, chill-out areas, emergency exits)
- * ☐ Plan for accessible pathways and facilities for attendees with disabilities

C. Technology & Infrastructure (Modern, Tech-Focused)

- * ☐ **Internet:** Secure dedicated high-speed Wi-Fi access for attendees and staff (ensure robust coverage across venue).
- * ☐ **AV Equipment:**
 - * ☐ Source High-Definition LED Walls/Projectors for stage & interactive zones.
 - * ☐ Rent Professional Sound System (PA system, microphones, DJ equipment).
 - * ☐ Arrange Intelligent Lighting Rig (stage washes, moving heads, atmospheric lighting).
 - * ☐ Procure multiple charging stations/power banks for attendee use.
 - * ☐ Arrange for on-site AV technicians.
- * ☐ **Interactive Tech:**
 - * ☐ Book VR/AR experience booths.
 - * ☐ Arrange for Gaming Consoles & PCs for e-sports tournaments.
 - * ☐ Secure displays for interactive art installations or coding showcases.
- * ☐ **Event Management Software:**
 - * ☐ Select Online Registration & Ticketing Platform with QR code generation.
 - * ☐ Choose Event App for schedule, maps, speaker info, live polls, push notifications.

- * ☐ **Photography & Videography:** Book professional team (including drone photography/videography for dynamic shots).

D. Content & Program Development

- * ☐ Define Festival Themes & Sub-events (e.g., Tech Talks, Coding Hackathon, Gaming Arena, Startup Pitch, DJ Night, Workshops)
- * ☐ Invite Keynote Speakers/Industry Experts relevant to tech & innovation.
- * ☐ Book Artists/Performers (DJ, VJ, Live Bands, Cultural Acts).
- * ☐ Develop Detailed Festival Schedule (main stage, parallel tracks, workshops).
- * ☐ Design Interactive Workshop Content (e.g., AI basics, app development, digital art).
- * ☐ Prepare MC scripts and stage announcements.

E. Catering Management

- * ☐ Finalize Menu based on modern, diverse, and appealing options (e.g., live food stations, fusion cuisine, healthy snacks, street food options).
- * ☐ Include options for common dietary restrictions (vegetarian, vegan, gluten-free, nut-free).
- * ☐ Research & Shortlist Catering Vendors in Hyderabad with experience in large events.
- * ☐ Conduct Tasting Sessions with shortlisted vendors.
- * ☐ Negotiate & Sign Catering Contract (including setup, serving, cleanup, staffing).
- * ☐ Plan for hydration stations (water dispensers, juice counters).
- * ☐ Arrange for sufficient seating and dining areas.

F. Marketing & Registration

- * ☐ Design Festival Branding (Logo, Color Palette, Marketing Collateral).
- * ☐ Develop Festival Website/Landing Page with event info, schedule, speaker bios, and registration link.
- * ☐ Create Social Media Strategy & Content Calendar (Instagram, Facebook, Twitter, LinkedIn).
- * ☐ Launch Early Bird Registration & Promotional Campaigns.
- * ☐ Design Digital Marketing Materials (e-flyers, social media graphics, video promos).
- * ☐ Engage College Ambassadors for grassroots promotion.
- * ☐ Implement a Hashtag strategy for social media engagement.

G. Sponsorship & Partnerships

- * ☐ Identify potential sponsors (tech companies, local businesses, educational platforms).
- * ☐ Develop Sponsorship Packages (tiered benefits).
- * ☐ Create compelling Sponsorship Proposal Deck.
- * ☐ Reach out to potential sponsors and secure agreements.
- * ☐ Finalize Sponsor Deliverables and Brand Integration Plan.

H. Staffing & Volunteer Management

- * ☐ Determine Staffing Needs for each functional area (Registration, Stage Management, Tech Support, Security, Catering, Information Desk).
- * ☐ Recruit & Onboard Volunteers.
- * ☐ Develop Comprehensive Training Program for all staff and volunteers (roles, responsibilities, emergency protocols, customer service).
- * ☐ Create Staff/Volunteer Schedule.
- * ☐ Prepare Staff/Volunteer Kits (T-shirts, ID badges, walkie-talkies if needed).

I. Health, Safety & Security

- * ☐ Develop detailed Emergency Response Plan (medical, fire, crowd control).
- * ☐ Coordinate with Venue Security & Hire Additional Security Personnel as needed.
- * ☐ Arrange for First Aid Station & On-site Medical Personnel.
- * ☐ Ensure all safety exits are clearly marked and unobstructed.
- * ☐ Plan for Waste Management & Recycling Stations.
- * ☐ Conduct Risk Assessment and Mitigation Strategies.

Phase 2: Event Day Execution

A. Pre-Event Briefings & Final Checks

- * ☐ Hold full team briefing (staff, volunteers, security, medical, catering, tech) to review schedule, roles, and emergency procedures.
- * ☐ Conduct comprehensive venue walk-through.
- * ☐ Distribute Radios/Communication Devices to key personnel.
- * ☐ Final check of all signage (directional, informational, branding).

B. Setup & Venue Readiness

- * ☐ Oversee Stage Setup (Sound, Lights, LED Screens).
- * ☐ Verify Tech Zones & Interactive Booths are fully functional and tested.
- * ☐ Arrange Registration Desks with laptops/tablets for QR code scanning & badge printing.
- * ☐ Set up Catering Stations, Dining Areas, and Hydration Points.
- * ☐ Place Charging Stations strategically.
- * ☐ Deploy Waste Bins and Recycling Stations.
- * ☐ Ensure Washrooms are clean, stocked, and accessible.
- * ☐ Final Security Sweep of the venue.

C. Registration & Welcoming

- * ☐ Open Registration Desks 60-90 minutes before official start.
- * ☐ Ensure smooth digital check-in process with QR code scanners.
- * ☐ Provide event maps, schedules, and welcome kits to attendees.
- * ☐ Staff information desk for queries.

D. Program Execution & Management

- * ☐ ****Stage Management:**** Ensure speakers, artists, and MCs are on schedule and briefed.
- * ☐ ****AV & Tech Support:**** On-site technicians to monitor sound, lighting, presentations, and resolve issues immediately.
- * ☐ ****Interactive Zones:**** Ensure continuous operation and staff engagement.
- * ☐ ****Catering Service:**** Oversee food delivery, setup, and timely replenishment. Maintain hygiene standards.
- * ☐ ****Crowd Management:**** Monitor crowd flow, especially at high-traffic areas and during performances.
- * ☐ ****Social Media Engagement:**** Live updates, photo/video sharing, respond to attendee queries online. Encourage use of event hashtag.
- * ☐ ****Sponsor Activation:**** Ensure sponsor booths/activations are running smoothly and deliverables are met.

E. Safety & Emergency Response

- * ☐ First Aid station fully operational and staffed.
- * ☐ Security personnel visible and actively patrolling.
- * ☐ Emergency exits clear and well-lit.
- * ☐ Incident reporting protocol active.

Phase 3: Post-Event Wrap-up

A. Teardown & Logistics

- * ☐ Oversee systematic dismantling of stage, tech equipment, and booths.
- * ☐ Coordinate equipment returns to vendors.
- * ☐ Supervise Venue Cleanup and Waste Disposal.
- * ☐ Conduct final venue inspection with venue manager.
- * ☐ Collect all lost & found items.

B. Financial & Administrative Closure

- * ☐ Process final payments to vendors, artists, and staff.

- * ☐ Reconcile event budget (actual vs. planned).
- * ☐ Collect all invoices and receipts.
- * ☐ Compile attendance reports and registration data.

C. Feedback & Evaluation

- * ☐ Distribute Digital Feedback Survey to attendees via event app/email.
- * ☐ Conduct Debrief Meeting with Core Organizing Committee, staff, and key volunteers to gather feedback (what went well, what could be improved).
- * ☐ Gather feedback from sponsors regarding their experience and ROI.

D. Reporting & Appreciation

- * ☐ Prepare Comprehensive Post-Event Report (attendance, budget, social media reach, key highlights, challenges, recommendations).
- * ☐ Create Sponsor Report with metrics and photos demonstrating their brand visibility.
- * ☐ Send Thank You notes/emails to sponsors, speakers, artists, volunteers, staff, and attendees.
- * ☐ Share event highlights (photos, videos) on website and social media.

E. Archiving & Future Planning

- * ☐ Archive all event documentation (contracts, permits, reports, photos, videos).
- * ☐ Conduct a "Lessons Learned" session for future event planning.
- * ☐ Start brainstorming for the next festival!
